PROFESSIONAL SUMMARY

Front-end Developer with 4+ years of experience building high-performance React and Next.js applications using Javascript and TypeScript. Proven ability to develop scalable, responsive interfaces and optimize frontend performance for production systems. Experienced with Redux, Tailwind CSS, and Strapi, and actively leverage AI-assisted tools to accelerate development, reduce delivery time, and improve code quality.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, JavaScript, TypeScript
- Backend: Strapi, Node.js, PostgreSQL, MySQL
- State Management: Redux, MobX
- UI Frameworks: Tailwind CSS, Bootstrap, Ant Design
- Core: HTML, CSS, Responsive Design, Performance Optimization

WORK EXPERIENCES

Fullstack Developer

Schutz Web Engineering Pte. Ltd. (Remote) | Oct 2023 - May 2025

- Build scalable full-stack applications using React.js, Strapi, Redux, and Tailwind
- Convert business requirements into clean, maintainable code and system logic
- Optimize performance, load times, and responsiveness across devices
- Write modular, reusable code with a focus on long-term maintainability
- Work remotely in fast-paced, agile environments

Key Projects:

Claim Monitoring Tool (CMT)

- Built data-driven platform for litigation analysis and reporting
- Implemented workflows and document processing features
- Implemented dynamic calculation logic with conditional rules for real-time data updates based on user input

Claimback

- Developed user-facing claim submission and tracking system
- Simplified complex legal processes into intuitive UI

Keen Law / HAHN Rechtsanwalte

- Delivered production-ready web platforms for law firms
- Ensured responsive design and stable performance

Front-End Developer

PT Astra International Tbk (Remote) | Jul 2022 – Aug 2023

- Built responsive and scalable front-end applications using React.js, Ant Design, MobX
- Transformed UI/UX designs into high-quality, production-ready interfaces
- Improved application performance through efficient state management and rendering optimization
- Collaborated closely with backend engineers and stakeholders to deliver integrated solutions

Key Projects:

RSSP (Retail Sales Supply Planning)

- Built a planning system for sales forecasting and supply integration
- Enabled users to analyze and compare sales data with planning and budget metrics

Odysseus

- Developed dynamic landing page generator for sales teams, reducing dependency on manual page creation

Front-End Developer

Citra Global Dinamika | Oct 2019 – Sep 2021

- Developed web and mobile applications using React.js and React Native based on client requirements
- Translated UI/UX designs into functional, responsive applications
- Maintained clean, scalable, and reusable codebases across multiple projects
- Collaborated with teams to deliver features aligned with business needs

Key Projects:

Task Management System

- Built a task tracking application with drag-and-drop workflow and collaboration features like Trello
- Enabled teams to manage progress, assign tasks, and track deadlines efficiently

Asset Management System

- Developed system to track asset location, quantity, and valuation
- Improved visibility and management of company assets

Notary Management System

- Built platform to manage document creation and tracking for legal processes
- Simplified document handling and improved workflow transparency

SPPD System (Government Project)

- Developed official travel management system for government use
- Automated cost estimation, reporting, and claim processes

EDUCATION

Bachelor's degree

Universitas Putera Batam
Computer Science (S.Kom)
2015 - 2019
